

MOBILE DEVICE eDISCOVERY

ADVANCED MESSAGE REVIEWSM

Optimize your review of mobile data with patent-pending innovation: **Advanced Message Review.**

- Compatible with all major review platforms
- Normalizes texts and chats from multiple sources and formats, including Facebook Messenger, WhatsApp, Snapchat, Skype and many more
- Threads individual messages to display relationship-based communication patterns between two or more parties
- Displays data in the same native conversation context as seen on the mobile device
- Facilitates the use of analytics features to reduce and prioritize documents for review

Mobile devices now dominate the share of total minutes spent online.

~23B NEARLY 23 BILLION CHAT & TEXT MESSAGES SENT EVERYDAY

A PATENT-PENDING, DEFENSIBLE APPROACH TO MOBILE DATA

Mobile data is one of the fastest growing sources of discoverable ESI. Yet, eDiscovery still depends on manual workflows - reviewing data collected from mobile devices outside of standard review platforms. Mobile data (SMS, IM, third-party chats, linked photos, videos, voicemails, etc.) is typically extracted in one bulk, comma delimited report or Excel file. Communications become rows and columns on a spreadsheet, creating an inefficient, time consuming and disconnected review process.

INTRODUCING ADVANCED MESSAGE REVIEW

Designed to automate and integrate the review of mobile data, Advanced Message Review converts mobile device images into a format that can be easily understood, searched, analyzed and reviewed. Chat conversations are threaded together and displayed as they would be on your mobile device. Photos, videos, and voicemails are linked in-line with time stamps so you can better understand conversation flow. And because Advanced Message Review is compatible with all major review platforms, including Relativity®, analytics tools, like concept clustering and search, can be used to reduce and prioritize documents for review.

FACTS ABOUT ADVANCED DISCOVERY

WHO

- **500+ team members**, including eDiscovery, cybersecurity, data forensics & compliance risk assessment experts
- **Dedicated software and applications team** for patented and patent- pending solutions development
- **Highest NPS Score and #1 overall ranking in the industry** for client satisfaction and early case assessment capabilities

WHAT

Full Portfolio of eDiscovery & Risk Management Solutions

- Advanced Discovery CompleteSM – eDiscovery Services
- Litigation Readiness
- Information Governance
- Cybersecurity
- Riskcovery[®] & Compliance Risk Assessment
- Legal Operations Consulting
- Data Forensics & Investigations
- Paper Discovery & Digital Printing

DATA CENTERS

- El Paso, TX*
 - Phoenix, AZ***
 - Lenexa, KS*
 - London, UK**
 - Washington, DC*
- * SOC2 Type II certified
** ISO 27001 certified
*** SOC2 & ISO 27001 certified

REVIEW CENTERS

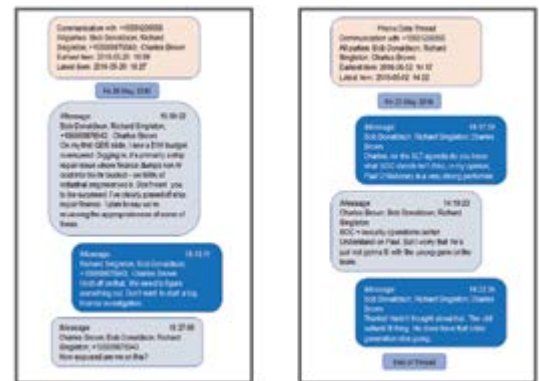

- Chicago, IL
- Detroit, MI
- Houston, TX
- London, UK
- Los Angeles, CA
- New York, NY
- Washington, DC

7 TURN-KEY REVIEW CENTERS NATIONWIDE

Our review facilities, security practices and data centers maximize review productivity while protecting your data from unauthorized access and inadvertent loss.

A CLOSER LOOK AT ADVANCED MESSAGE REVIEWSM

Conversation threads are viewable in the same look and feel of native apps on the mobile devices.

In-line images, videos and voicemails can be seen and reviewed within the conversation threads.

Deleted messages that are recovered can be easily identified.
