- Expert workflow design
- Predictive coding and search filtering
- Relativity<sup>®</sup>-certified experts
- Metric tracking
- Quality control oversight
- Assistance on any size project, at any step in the review process

## CHALLENGE

A large telecommunications corporation involved in a merger investigation needed document collection, processing, hosting, review and production services for a large-scale and high-stakes second request antitrust matter.

## SOLUTION

Working under a tight staffing and production deadline, Advanced Discovery immediately began collection and processing of the documents for review. In parallel, the project managers quickly staffed up with an initial 75-member high-quality review team who worked seamlessly in conjunction with two separate outside counsel law firms. Due to the volume of documents involved in second request matters, Advanced Discovery was asked to assign another 25 attorneys to meet production demand. The nearly 100 reviewers worked as a team to deftly and deliberately review the documents and meet the aggressive deadline.

## ADVANTAGE

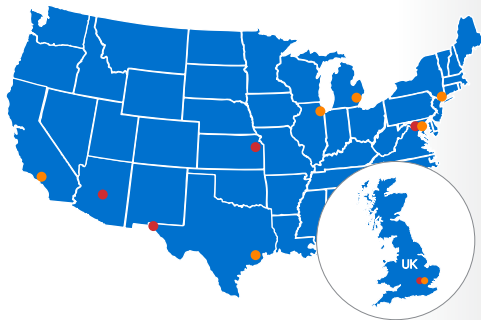

Following the two-month review and Advanced Discovery's successful production of documents, the need for an additional quick-turnaround production required immediately bringing back 40 of the original team's review attorneys. This review team worked for seven straight days to ensure that all deadlines were successfully met on time and on budget.
