- Qualified attorney reviewers and managers
- Expert workflow design
- Predictive coding and search filtering
- Relativity[®]-certified experts
- Metric tracking
- Quality control oversight
- Assistance on any size project, at any step in the review process

CHALLENGE

An IP litigation law firm was faced with discovery production deadlines and needed assistance with the collection, processing, hosting, review and production for a high-profile international trademark dispute for an international media company.

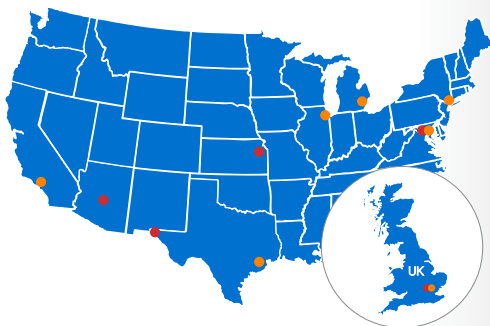

SOLUTION

With source data located in Central America and Texas, Advanced Discovery's Project Management Team and technologists created a global, end to end workflow and action plan from collection to production. The team processed, prepped and hosted data in Advanced Discovery's secure processing facility in Kansas. With clear communication channels across eDiscovery and review divisions, Advanced Discovery's Managed Review Team hit the ground running, quickly assembling a team of contract attorneys at the Los Angeles Review Center.

ADVANTAGE

Advanced Discovery's Review Manager collaborated with managing counsel to create the coding manual, live-test the coding protocols, and perform the entire review, including relevance and privilege, in English and Spanish. Working overtime and throughout the weekend, Advanced Discovery's Managed Review team delivered quality, defensible production that met deadlines at 25% below budget.
